

Pacer 12" Commercial Upright Vacuum & Filter Bags

Designed for Performance and Value

- **Lightweight and Durable** single motor upright with a 12" cleaning path.
- **Powerful** – 1.7 HP 2-stage vacuum motor draws 92 inches of water lift and 100 CFM of air flow.
- **Unique Features** – All important touch points are colored green. Crevice tool, round brush tool, spare bag storage compartment, bag full indicator, thermally protected motor, impact resistant polypropylene body, and adhesive bag seal for dust free disposal.
- **Easy to Maintain** – Quick-change cord. Tool-less brush replacement. Simple clog removal.
- **Performance** – Three stage filtration system with HEPA performance. 99.97% efficient at 0.3 microns.
- **Fully Compliant** – Meets all LEED-EBOM standards. CRI Gold rated. Quiet operation at only 67 dBA.
- **Proper Ergonomics** – Adjustable handle height, ergonomic grip, transport handle, and foam grip high-up cleaning tube.
- **Versatility** – Low profile for easy vacuuming underneath furniture and fixtures. Extension wand reaches over 10' above the floor. 3" round brush and 10" crevice tool with onboard storage.
- **Patented WAVE-LOK® Filter Bag** – with alignment mechanism assures the filter bag is securely installed every time and allows for easy bag removal, even if overfilled.
